

MAXX MDR

NEXT GENERATION MANAGED DETECTION + RESPONSE

MAXX MDR is the next generation of Managed Detection and Response, providing proactive prevention and rapid response to today's, and tomorrow's, most pervasive threats.

A HOLISTIC APPROACH TO CYBERSECURITY

MAXX MDR, a holistic, three-pronged approach to cybersecurity protection. The problem is many cyberattacks have become increasingly sophisticated with ample funding and automation. Most MDR providers lack integration expertise due to insufficient workflow across disparate products and services. What sets MAXX MDR apart is its proprietary solutions, custom-built in-house to work together collaboratively to protect your organization. MAXX MDR doesn't solely detect and remediate cyberattacks; We strive to prevent them.

FEATURES

- Three purpose built platforms designed with SOAR in mind
- Fully managed network security on-premise and in the cloud
- Partnership with industry leading endpoint security with CrowdStrike Falcon
- Cloud-native SIEM and analytics platform for better integration with SAAS and IAAS

BENEFITS

- 24/7/365 management by CyberMaxx Security Operations Center of experts
- Full stack visibility of your assets both on-prem and in the cloud
- Improved MTTR and reduced false positives through automation and orchestration
- Proactive approach to identifying threats and protecting vital assets
- Meet compliance regulations and gain critical insights needed to protect your network

MAXX MDR : THE TRIFECTA

CyberMaxx's combination of three proven technologies drives deeper analysis and more proactive prevention, freeing organizations to focus on their business initiatives at a fraction of the cost (and headache) of managing multiple vendors or building a solution in-house. MAXX MDR is comprised primarily of three technologies, along with optimal 24/7/365 monitored protection, both on-prem and in the cloud: **MAXX SIEM**, **MAXX NETWORK**, and **MAXX EDR**.

MAXX SIEM

Custom-developed analytics platform that focuses on threat detection and minimizes false positives, providing unprecedented visibility and noise reduction.

MAXX NETWORK

Provides around-the-clock security monitoring, tailored to your organization's unique needs; security sensors with a shared threat model address new and emerging threats.

MAXX EDR

In partnership with CrowdStrike, our MAXX EDR service ensures endpoint security, handle containment and remediation, all while safeguarding your network to the max.
