470%

Healthcare organizations experienced a **470% increase** in ransomware attacks *in 2020 alone*.

Source: Fierce Healthcare

YOUR NEEDS

Based on our discussions, we understand that *CLIENT* is seeking holistic protection from the increasingly sophisticated cyberattacks that are rampant today, especially in the healthcare space.

Proactively protecting your organization is critical. While many organizations choose "best-of-breed" products with the hope of holistic protection, the truth is disparate products don't integrate well and require tons of upkeep. What sets MAXX MDR apart is its proprietary solutions, custom-built in-house to work together collaboratively to protect your organization. MAXX MDR doesn't solely detect and remediate cyberattacks; we strive to prevent them.

The Solution: MAXX MDR

MAXX MDR is the next generation of Managed Detection and Response, providing proactive prevention and rapid response to today's and tomorrow's most pervasive threats.

MAXX MDR: The Trifecta

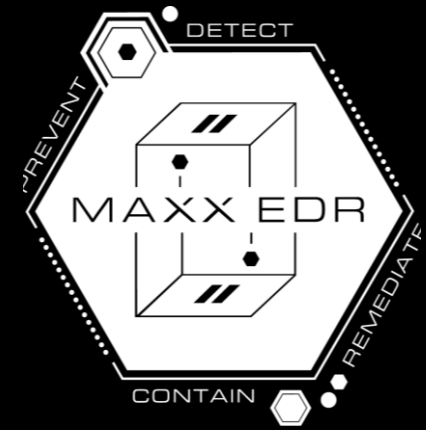

MAXX SIEM

Custom-developed analytics platform that focuses on threat detection and minimizes false positives, providing unprecedented visibility and noise reduction.

MAXX NETWORK

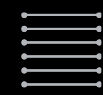

Provides around-the-clock security monitoring, tailored to your organization's unique needs; security sensors with a shared threat model address new and emerging threats.

MAXX EDR

In partnership with CrowdStrike, our MAXX EDR service ensures endpoint security, handle containment and remediation, all while safeguarding your network to the max.

FEATURES

PURPOSE-BUILT

Three purpose-built platforms designed with SOAR in mind.

NETWORK SECURITY

Fully managed network security on-premise and in the cloud.

ENDPOINT SECURITY

Partnership with industry leading endpoint security with CrowdStrike Falcon.

SIEM AND ANALYTICS

Cloud-native SIEM and analytics platform for better integration with SAAS and IAAS.

BENEFITS

24X7X365 SOC

24/7/365 management by CyberMaxx Security Operations Center of experts.

NOISE REDUCTION

Improved MTTR and reduced false positives through automation and orchestration.

FULL STACK VISIBILITY

Full stack visibility of your assets both on-prem and in the cloud.

PROACTIVE PROTECTION

Meet compliance regulations and gain critical insights needed to protect your network.
